

On October 21, 2019, the Town of Bryson City received a Sewer Line Moratorium from the North Carolina Department of Environmental Quality (NCDEQ). After a review of our discharge monitoring report data for the period August 2018 through July 2019, they found that we have exceeded the 80% threshold of our treatment capacity. More information will be posted to our website and facebook page when we have clarification and answers to several questions from NCDEQ.
